

# Oracle Cloud Upgrade Safe Testing (OCUST)

The Smart way of testing your Oracle SaaS Application

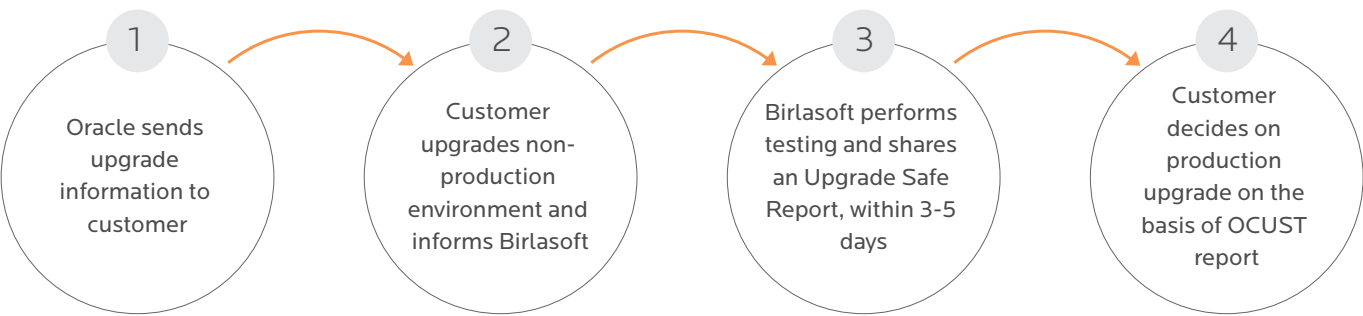

OCUST, an Automated Regression Testing as a Service is a subscription-based offering. The OCUST library consists of pre-built automated test cases for every Oracle SaaS Cloud application. Customers can choose their relevant test cases as part of the subscription. Then, Birlasoft executes relevant automated test scripts in the customer's non-production environment and generates a detailed validation report of the impact on the business flows. If any customer specific test cases need to be tested as part of this testing, Birlasoft will develop and execute it on every patch deployment.

## Why OCUST?

Oracle SaaS Cloud Applications Upgrade every quarter. These upgrades consist of newly added features in addition to bug fixes. Oracle SaaS Cloud Customers want to take on new versions, but need support for:

- Regression testing of their configuration with new version
- Detailed report of what is applicable in the upgrade for their industry and business
- Resolution of expected upgrade issues

## Why OCUST?

# OCUST Library

OCUST has the pre-built list of use cases for many Oracle SaaS Cloud application and customers can choose their relevant use cases from this pre-built library. The below is the list of applications covered under OCUST:
